SUMMARY

Full-Stack Developer with hands-on experience building web applications using the MERN stack (MongoDB, Express.js, React.js, Node.js). Skilled in developing REST APIs, database integration, and responsive UI development. Experience working in agile environments, collaborating with cross-functional teams, and supporting production deployments. Strong problem-solving skills with a focus on writing clean and maintainable code.

TECHNICAL SKILLS

- **Languages**: JavaScript, Python, Java
- **Frontend**: React.js, Redux Toolkit, HTML5, CSS3/SCSS, Bootstrap, Material UI, Tailwind CSS
- **Backend**: Node.js, Express.js
- **Databases**: MongoDB, MS SQL, MySQL
- **Tools & DevOps**: Git, GitHub, Postman, Docker, Render, Netlify
- **Analytics Tools:** Power BI, Tableau, Excel
- **IDEs**: Visual Studio Code, Google Colab, Jupyter Notebook

---

WORK EXPERIENCE

Back Operation Developer

Studio Marvel Pvt Ltd, Chennai — Jan 2026 – Present

- Worked with inventory management software systems to validate and cross-check stock entries with Excel records.
- Utilized **SQL** queries for data extraction and report validation, supporting operational decision-making.
- Coordinated with warehouse and operations teams to track and update stock movement, handling 100+ roll transactions daily.
- Streamlined Excel-based tracking processes, reducing manual entry errors by 20% and improving reporting efficiency.

Full-Stack Developer

Kodukku Classified Pvt Ltd, Chennai — July 2024 – July 2025

- Developed and maintained a full-stack classifieds web application using **React, Node.js, and Material UI,** serving 10,000+ monthly active users.
- Developed and maintained a full-stack web application using React.js and Node.js, supporting 10,000+ users.
- Applied **Java OOP concepts** to understand backend workflows and logic structuring.
- Built dynamic UI components and integrated APIs for real-time data updates.
- Implemented role-based access control and dashboard functionalities.
- Developed REST APIs and handled backend logic using **Node.js.**
- Wrote optimized **SQL queries,** improving query performance by 20%.
- Reduced redundant database calls, improving API response time.
- Collaborated with team members during development and deployment cycles.

Software Developer
Evolve Automotive, Chennai May 2023 - July 2024

- Contributed to frontend development using React.js by building reusable UI components.
- Assisted in integrating REST APIs and handling data flow between frontend and backend.
- Supported backend development tasks using **Node.js and Express.js.**
- Worked with databases to perform basic CRUD operations and query handling.
- Participated in debugging, testing, and resolving application issues.
- Collaborated with product and design teams to improve user experience.
- Gained exposure to full-stack development practices in a fast-paced startup environment.

Junior Software Developer
Lorven Technologies Inc, Chennai Mar 2022 - May 2023

- Developed reusable frontend components using React.js, improving UI consistency.
- Assisted in backend API integration and data flow handling.
- Supported Node.js backend operations and database interactions.
- Performed debugging and resolved application issues, improving stability.
- Contributed to faster feature delivery in a startup environment.

EDUCATION

- **Patrician College of Arts and Science, Chennai (Affiliated to University of Madras)**
  Bachelor of Science (B.Sc.) in Mathematics June 2017 - Mar 2020

PROJECTS

- **Online Music Player** – Build an **MERN-based music player** integrating **Redux** for state management. Implemented secure user authentication and data storage with MongoDB Atlas. Utilized Postman for robust backend validation and Tailwind CSS for visually appealing UI design. GitHub Go Live
- **Sales Performance Dashboard (Power BI)** – Designed an **interactive Power BI dashboard** analysing sales, profit, and target achievement across four regions. Built **DAX measures** for Total Sales, Profit Margin %, and Target Comparison. GitHub
